Partners: Neil Sanghvi (ns3873) & Helal Chowdhury (HC2324)

For part 4, the features that we will be implementing are:

1)Manage Follows

    a) User enters the username of someone they want to follow. Finstagram adds an appropriate tuple to Follow, with acceptedFollow == False.
    b) User sees list of requests others has made to follow them and has the opportunity to accept, by setting acceptFollow to True or to decline by deleting the request from the Follow table.

2) Like Photo
3) Search by Poster
4) Add FriendGroup
5) Add Friend

Neil Sanghvi will be responsible for implementing 1a, 1b and 2
Helal Chowdhury will be responsible for 3,4,5

Neil will check Helal's work and Helal will check Neil's work
